

How to make Playdough

You will need:

2 cups flour, 2 tbsp cooking oil, 1 cup salt, 2 drops of food colouring (x3 different colours), 1 cup hot water, 3 bowls, mixing spoon.

Mix flour, salt, water and oil together in a bowl.

Separate the mixture into three bowls.

Add 2 drops of different coloured food colouring to each bowl. You can use your colour mixing skills to create new colours if you want.

Knead the mixture in each bowl with your hands to turn it into playdough. If it feels a bit sticky, sprinkle in some more flour.

When you're finished playing with your playdough, store it in an airtight container so that it doesn't dry out.
