

Explore Brownies - Resources

The resources below are a guideline for what you can expect to see in some of the Explore Brownies activities.

Many activities require no special resources, but you can swap/change the resources for things you already have at home for any activity. For example; googly eyes can be made by using cardboard, paper and a marker.

As you and your Explore Brownie can choose which activities to do, you can choose to do ones that don't require you to buy resources, especially if you live remotely.

We hope you have fun with the activities in Explore Brownies and we can't wait to see what you do!
